

SAGAR BERA

Backend & DevOps Engineer

Email: contact.sagarbera@gmail.com | Mobile: +91 7980406755 | sboy99.xyz | github.com/sboy99 | linkedin.com/sagar-bera

Founding backend and DevOps engineer with 3+ years building and running the systems behind products used by 50,000+ creators — including one listed in Product Hunt's Top 3 AI Products of the Week. I own everything from database design to production infrastructure and smart contracts, shipping fast with AI-native tooling.

WORK EXPERIENCE

Founding Engineer, Backend & DevOps — Scribble Network

Feb 2024 – Present

TypeScript, NestJS, PostgreSQL, Solidity, AWS, GCP, Docker, Terraform | Bengaluru

- **Infrastructure at Scale:** Run production infrastructure handling **100–300 requests/sec** for **1,500–2,000 daily active users**, with automated GitHub Actions deployments and full observability via Grafana and Loki.
- **Data Migration:** Migrated core data from MongoDB to **PostgreSQL** for cleaner structure and faster queries, making new features far easier to ship.
- **Products & Recognition:** Built Scribble for Creators (**50,000+ creators**, **\$500,000+ paid** across **800+ campaigns**) and Scribble for Brands, listed in Product Hunt's **Top 3 AI Products of the Week**.
- **Smart Contracts:** Wrote **Solidity** (EVM) and **Move** (Sui) smart contracts powering prediction markets and automated trading.
- **Systems Built From Scratch:** Built auth (magic links, Google, X login), notification/webhook microservices, and crypto payout infrastructure — using Cursor and Claude Code daily to ship as a high-output team of one.

Backend Engineer — BuidlersTribe

May 2023 – Feb 2024

TypeScript, Node.js, Express.js, MongoDB, AWS | Bengaluru

- **Platform Migration:** Led the move from Drupal (LAMP) to a custom **MERN** stack — speeding up feature delivery by **30%** and deploying the app on AWS behind Nginx.
- **Product Growth:** Relaunched with a cleaner, more usable interface on the new stack, growing daily active users.

FEATURED PROJECTS

Kili 2026

AI-era ad marketplace that pays developers back their inference costs by showing ads while an agent is “thinking.”

Stack: TypeScript, Next.js, NestJS, PostgreSQL, Stripe

Scribble for Brands 2026

AI visibility platform tracking how ChatGPT, Gemini, and Perplexity cite a brand — grew one client's citation share **from 2% to 20% in 3 months**; Product Hunt **Top 3 AI Product of the Week**.

Stack: TypeScript, Next.js, NestJS, PostgreSQL, Redis

Scribble for Creators 2025

Campaign platform where creators write for brands and get paid — now serving **50,000+ creators** with **\$500,000+ paid out** across **800+ campaigns**.

Stack: TypeScript, Next.js, NestJS, PostgreSQL, Redis

PROGRAMMING SKILLS

Languages: TypeScript, JavaScript, Python, Go, Solidity, SQL

Frontend: React, Next.js, Tailwind CSS, Redux, React Query

Backend: Node.js, Express.js, NestJS, REST APIs, Prisma, TypeORM

Databases: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, GitHub Actions, Terraform, Grafana

AI Tools: Cursor, Claude Code, OpenAI GPT, Anthropic Claude

EDUCATION

M.Sc. in Computer Science 2021 – 2023

Panskura Banamali College (Autonomous)

B.Sc. in Computer Science 2018 – 2021

Panskura Banamali College (Autonomous), CGPA: 8.58

EXTRACURRICULAR

- **Certifications:** Postman Student Expert, Triplebyte-certified JavaScript Engineer, 5-star HackerRank (CSS).
- **YouTube:** Silver Play Button for crossing 100,000 subscribers.
- **Languages:** English, Hindi, Bengali.
