

Sagar Bera

Backend & DevOps Engineer

contact.sagarbera@gmail.com | +91 7980406755 | sboy99.xyz | github.com/sboy99 | linkedin.com/in/sagar-bera

SUMMARY

Backend and DevOps engineer with 3.5 years building and running production systems for products used by 50,000+ creators, including one named in Product Hunt's Top 3 AI Products of the Week. Experienced across the full stack — database design, API development, cloud infrastructure, and smart contracts. Joined as the first backend hire and worked closely with the CTO on key infrastructure decisions as the team grew.

WORK EXPERIENCE

Backend & DevOps Engineer — Scribble Network

Feb 2024 – Present · Bengaluru

TypeScript, NestJS, PostgreSQL, Solidity, AWS, GCP, Docker, Terraform

- Run production infrastructure with automated GitHub Actions deployments and observability via Grafana and Loki.
- Partnered with the CTO on an AWS-to-GCP migration for cost efficiency, keeping the product live throughout.
- Executed a CTO-directed migration of core data from MongoDB to PostgreSQL, improving query performance and simplifying the schema for faster feature development.
- Built Scribble for Creators (50,000+ creators, \$500,000+ paid across 800+ campaigns) and Scribble for Brands, named in Product Hunt's Top 3 AI Products of the Week.
- Wrote Solidity (EVM) and Move (Sui) smart contracts powering prediction markets and automated trading.
- Built authentication (magic links, Google, X login), notification/webhook microservices, and crypto payout infrastructure from scratch, using Cursor and Claude Code to maintain high output.

Backend Engineer — BuidlersTribe

May 2023 – Feb 2024 · Bengaluru

TypeScript, Node.js, Express.js, MongoDB, AWS

- Led the migration from Drupal (LAMP) to a custom MERN stack, speeding up feature delivery by 30% and deploying on AWS behind Nginx.
- Relaunched the product with a cleaner interface on the new stack, growing daily active users.

FEATURED PROJECTS

- **Kili (2026)** — AI-era ad marketplace that pays developers back their inference costs by showing ads while an agent is “thinking.” TypeScript, Next.js, NestJS, PostgreSQL, Stripe. Built in 4 days with Cursor AI: two servers (public API and internal), two integration packages for developers, and the UI; 250+ daily active developers.
- **Scribble for Brands (2026)** — AI visibility platform tracking how ChatGPT, Gemini, and Perplexity cite a brand; grew one client's citation share from 2% to 20% in 3 months.
- **Scribble for Creators (2025)** — Campaign platform where creators write for brands and get paid; 50,000+ creators, \$500,000+ paid out across 800+ campaigns.

OPEN SOURCE

- Contributed React UI components to Mintlify's open-source documentation component library.
- Built GitOpener, an open-source platform teaching new contributors how to make their first GitHub contribution.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, Solidity
- **Backend:** Node.js, Express.js, NestJS, REST APIs, Prisma, TypeORM
- **Databases:** PostgreSQL, MongoDB, Redis, MySQL
- **Frontend:** React, Next.js, Tailwind CSS
- **Cloud & DevOps:** AWS, GCP, Docker, GitHub Actions, Terraform, Grafana, Loki
- **AI tooling:** Cursor, Claude Code

EDUCATION

M.Sc. in Computer Science, Panskura Banamali College (Autonomous) — CGPA 8.63/10	2021 – 2023
B.Sc. in Computer Science, Panskura Banamali College (Autonomous) — CGPA 8.58/10	2018 – 2021

ADDITIONAL

- Postman Student Expert; Triplebyte-certified JavaScript Engineer; 5-star HackerRank (CSS).
- YouTube Silver Play Button (100,000+ subscribers) — personal project.
- Languages: English, Hindi, Bengali.
